## College Graduates Up Birth Rate

WASHINGTON (AP) Women who are college graduates are beginning to have more babies.

While they still aren't having as many babies as the women who haven't gone to school at all, the college rate showed surprising gains from 1940 to 1947.

That's what the Population Reference Bureau said Thursday. The bureau was founded as a nonprofit, scientific, educational organization to coordinate and distribute population data. It's supported by donations.

It was recently a few weeks ago the bureau was gloomy about the college graduate mother. Ditto for father.

It has completed a study on the graduates of 25 years ago, and this was so bolivert the bureau wondered: "Does A. B. mean abash babies?"

The class of '24, the bureau found, was falling far short of replacing itself.

But the more recent collegians are doing much better.

Census Bureau figures show that during 1940-1947 the girl graduates have increased the birth rate for their group by 81 per cent. This compares with a 32 per cent average gain for all women.

But, continues the bureau, despite the new graduating class college still don't have babies at the rate of the less educated.

## BYU Professor Receives Ph.D.

Leon Dallin, associate professor of music at Brigham Young University, has been awarded a doctorate in philosophy from the University of Southern California.

Dr. Dallin wrote the composition "Symphony in D," as the dissertation requirement for a Ph.D. He previously served as a member of the USC music faculty for three years before joining the BYU music staff in 1944.

He is a native of Utah and received his early education in the U. S. Army during World War II, including three years in the European-African Theater.

Dr. Dallin is teaching composition and music history in the current BYU summer session.

## Astronomer To Lecture In Assembly Thursday

Harry G. Johnson, astronomer at the Brown Foundation, Walla Walla, Washington, will speak in assembly today at 2:30 p. m. in the Joseph Smith auditorium.

Mr. Johnson's subject today will be "The Sun as an Ordinary Star." This will be the second in a series of three lectures on astronomy given by Mr. Johnson.

The final lecture "Today's More Advanced Astronomy" will be presented today at 7:30 p. m. in the Joseph Smith auditorium.

## Dance Recital Cancelled

The dance recital, originally scheduled for tonight by Miss Mary Tiffany, has been cancelled, according to a report received through Public Relations here. No explanation was given except that her whole tour has been cancelled.

**TAKES OVER NEW POST.**—Dr. Christen Jensen, left, gives instructions to the new dean of the Graduate School of Brigham Young University, Dr. Asael D. Woodruff. Dr. Woodruff succeeds Dr. Jensen, professor emeritus at BYU.

## Clarinet Ensemble Recital To Be Presented Sunday

Unusual to the people of this area will be the program presented by the Brigham Young University Music Department this Sunday.

The woodwind ensemble class under the direction of the famed clarinetist, Simeon Bellson, will be presented in a chamber music recital July 10, at 2:00 p. m. in the East Lounge of the Social Center. According to Mr. Bellson, "The people will be surprised when they hear what can be done on a clarinet." The program will include ensemble numbers, quartets, quintets, duets, sextets, and concertos.

For the opening number the entire ensemble class consisting of thirteen clarinetists will play "Entr'acte" from the opera "Tzar's Bride" by Rimsky-Korsakoff and arranged by Bellson; Harley Sandberg, Merrill Durfee, Shirley Sellers, and Glynis Rollins will play "Intermezzo in E flat" by McDowell for three clarinets and bass clarinet; "Larghetto" Quartet for piano, oboe, clarinet, horn, and bassoon, by Mozart will be played by Bonnie Messner, Harley Sandberg, Lucille Sandberg, Paul Slack, and Paul Woodstein.

"Pique for two clarinets in E flat" by Kropf will be played by Vernon Jackson and Alfred Morris; Shirley Sellers, Glynis Rollins, Lucille Love, and Betty Lou Childers will play a concerto for four clarinets by Tiesman, "Adagio" and "Allegro," "Cavetto" by Tiesman will be played by Nola Maughan, Rutland, Harley Sandberg, Lucille Sandberg, clarinetist, Paul Slack, horn player, Lynn Woolsten, bassoon player, and Bonnie Messner, pianist; a quartet for four clarinets, "Andante" and "Scherzo" by Crose will be played by Lucille Sandberg, Richard Jones, Harley Sandberg, and Ben Roberts. As the final number, the entire ensemble class will play Beethoven's "Introduction, Theme and Variations."

Parents, students, and friends are invited to attend.

Dr. Charles F. Alexander, dean of sciences at University of Massachusetts, is a visitor at the Aspen Grove campus of Brigham Young University this week. The eastern scientist, who is an authority on entomology, is gathering specimens in the Mt. Timpanogos area along with BYU biology students and faculty members.

## New Graduate School Dean Takes Position At BYU

Dr. Asael Woodruff, known in education circles as Cornell University, officially took over his new position as dean of the graduate school at Brigham Young University Friday.

The new dean will succeed Dr. Christen Jensen, professor emeritus of history and political science, whose retirement from the university faculty becomes effective this summer. Dr. Jensen had been dean of the graduate school since 1944 and was chairman of the division of graduate work which presided over the organization of the graduate school.

## Registration Hits New Record

Summer school registration at Brigham Young University has passed the 1500 mark and is 15 per cent above the previous record of last year. It was reported last week by Dr. Wesley T. Lloyd, dean of students.

This total includes only resident students in regular classes on the campus, said Dean Lloyd. With the addition of registrants in the special institutes and conferences held during the quarter the total registration figure is expected to exceed 2000 by the end of the summer, he said.

Enrollment in the 1949 summer session is particularly heavy in the graduate school, the college of education, and the college of arts and sciences. It was reported a large number of teachers and advanced students working toward master's degrees has brought the largest percentage increase to the graduate school.

Veterans constitute 45 per cent of the summer enrollment as compared with 40 per cent during the regular school year, the registrar's office shows. This is an indication that veterans are seeking to accelerate their university training on a year-round basis, Dean Lloyd commented.

A wide geographical distribution is represented in the summer registration. The university rolls show students from nearly every state of the union as well as from many points outside the United States including Canada, Mexico, Hawaii, Brazil, Argentina and students in Europe and Asia.

## Astronomy Exhibit Will Display Unusual Collection of Meteorites

Sixteen meteorites, ranging from a 91-cent iron fragment to a specimen weighing only a few grains, are being displayed at the Brigham Young University this week.

The exhibit will be displayed on the second floor of the library building. It is one of the most unusual collections ever shown, according to Dr. Ariel S. Baliff, acting dean of the summer session. The display came to BYU in connection with three talks to be given by Harry O. Johnson, lecturer-astronomer of the Brown Foundation at Walla Walla, Wash. Each evening the 94-cent fragment of meteorite from the foundation will also be set up for would-be star gazers.

More well known specimens in the meteorite exhibit include the 91-cent Barringer Meteorite, a fragment of iron which crashed

Dr. Woodruff is a native of Salt Lake City and took his undergraduate studies at University of Utah. He received his B. S. degree from Brigham Young University. He received the Ph.D. degree from University of Chicago in 1937. He received the Ph.D. degree from University of Chicago in 1937. He received the Ph.D. degree from University of Chicago in 1937.

Following his studies at BYU he taught in the LDS seminaries at Berneville, Fillmore and Price, and in 1941-42 served as first director of the LDS Institute at Weber College.

Appointed to the staff of Cornell University in 1942, Dr. Woodruff has served as director of the Bureau of Educational Research and Service and director of the Cornell University Testing Service.

He is author of a book, "The Psychology of Teaching, and numerous articles for professional journals in the fields of education and psychology."

He is former executive secretary of the National Seminar on Psychology in Education, and a member of the American Association for the Advancement of Science, American Psychological Assn., Sigma Xi, National Education Assn., and Phi Delta Kappa.

Dr. Woodruff and his wife, the former Eva Slack of Salt Lake City, came to Provo this week from Ithaca, N. Y., with their two daughters, Gail, 10, and Carolyn, 8.

Dr. Woodruff is the son of the late Elias S. Woodruff, former general manager of The Deseret News and president of the Western States and Central States Missions of the Church of Jesus Christ of Latter-day Saints. His mother lives at 2315 Windsor Street, Salt Lake City. He was recently appointed a member of the general board of Young Men's Mutual Improvement Association.

Some of the specimens have been sliced open and polished so that the interior structure may be seen. Analysis of the Harrington Meteorite reveals that it consists of 50 per cent of iron, named for its shape. All are specimens from the Ninger Collection of the American Meteorite Museum of Winslow, Ariz.

Some of the specimens have been sliced open and polished so that the interior structure may be seen. Analysis of the Harrington Meteorite reveals that it consists of 50 per cent of iron, named for its shape. All are specimens from the Ninger Collection of the American Meteorite Museum of Winslow, Ariz.

## Schedule of Events

July 7—Mary Tiffany in dance recital (Cancelled).

July 8—Studentbody dance, 8:30 p. m., Smith Ballroom.

July 10—Chamber music, Social Hall.

July 11—Musical recital featuring J. Harris, Simon Bellman, Frances Watkins, Miss Williams.

July 12—The opera "Bastien et Bastienne" Willard Rhodes, conductor.

July 13—The opera "The Medium" Willard Rhodes, conductor.

## Educator In Public School Music Returns To BYU By Popular Demand

"Every child in America should participate in music in an 'ideal school situation,'" stated Glenn Gildersleeve, summer music faculty member at Brigham Young University.

Making his life work a "specialty in working with non-specialists" in music, Mr. Gildersleeve has used the principle that to get music in the rural school classroom, teachers must be taught methods of putting music over.

Music was established in the city schools of America in 1832, yet today over half the children attending rural schools in America have no music.

"After attending a rural school where there was no music, I have made my particular interest that of music for children in the small town of America," explained Mr. Gildersleeve.

It is now possible to work out a program where every child can participate in music due to the development of mechanical aids such as the phonograph and fine recordings, and the electrification of nearly all one-teacher schools.

"The teacher who can't turn a tune in a forty acre lot can still carry on a program of music," continued Mr. Gildersleeve. "With the use of sets of books on music with records keyed in with the books, and with simple instruments such as the Melody Flute, Marimba, and Auto-Harp the interest of every child can be reached and there can be a great deal of variety in the music field. In such a program as this every child can have the experience of playing some instrument as well as singing."

Professor Gildersleeve is head of the Music Department at Madison State College, Virginia, and for 16 years has worked around the non-specialist in music, or the average teacher in the programs developed in training the average teacher to use instruments and mechanical aids to give all children a musical background. Mr. Gildersleeve concluded you can always find some things in the music field that every classroom teacher can do effectively.

## Students Neglect University Life

At a university there are so many functions that sometimes students can't possibly attend all the good things they would like to. Nevertheless, there are many excellent features of university life that are willingly neglected by students who are either just plain lazy, or just don't care.

Many of the devotional assemblies as well as the regular assemblies at this school lecture excellent speakers, rare talent and well planned student programs. Yet time after time these fine features reach only about 100 to 150 students out of our approximately 1350 attending summer school here.

The 11 a. m. periods on Tuesdays and Thursdays have been set aside for assemblies, but the conscientiousness with which many students stay away from them is certainly no compliment either to the school or to the students.

We're wondering, for example, how the worth of an ice cream cone compares with the worth of a man who has spent years of specialized training in science, how a mid-morning nap compares with a famous musician, how a bull session on the lawn compares with an authority on sociology, how being on hour later in getting one's mail compares with a timely one of the Twelve Apostles, how a decision to "just go home" compares with seeing and hearing student talents, how grinding through one more chore compares with talks by specialists on Air Age education.

True, all of these things are important, but the point is, the specialists and artists are but rarely available to us; the other things can be had almost any time, day or night. There is time for all of them.

## Monologue in Physics

There is no physics in my mind,  
Nor Math, nor algebra of any kind,  
I'm forced to wonder how I landed  
In a class that keeps me mentally stranded  
If Physics read like Cinderella  
I might remember Torricelli;

Or that "black body" radiation  
According to Planck is some creation.  
Count Rumford had a funny notion  
That heat is really a kind of motion,  
It's measured by caloric aid,  
One gram to one degree centigrade.  
My mind goes into mental snails  
When pressure is given according to Charles;  
It might as well be according to Boyle  
But it varies inversely according to Boyle.  
It really would seem a bit of heaven  
If I could remember that law of Stefan;  
I think he said, "The rate of radiation  
Varied as the fourth power of"—tarnation!  
Maybe I'll get Wein's displacement law  
"A rise in temperature"—listen now—  
"Is accompanied not only by increase—"

According to me these laws should cease  
Isobars, temperature, ergs, thermometers,  
Lulaphere, hydrosphere and hygrameters,  
Must have a meaning in the minds of the great  
But let me stop simply, I simply don't rate  
With apologies to a wonderful instructor—  
By Alda T. Gardner.

## Campfire Fun Is Slated For Annual 'Timp' Hike

Campfire activities will precede the thirty-eighth annual Timpanogos hike, slated for July 30, C. J. Hart, professor of physical education at Brigham Young University and chairman of the annual community hike, announced Thursday.

Mr. Hart said that the traditional hike will be made Saturday morning and that an outstanding campfire program is being arranged for the preceding night in the vast amphitheater that is being made ready for the event.

This year's program and hike will be featured by the presence of Eugene L. (Timpanogos) Roberts, founder of the affair that has attracted national recognition. He is currently in Provo and will be present for this thirty-eighth anniversary of its founding. He may not make the climb, he said, but "his heart will be with the climbers" and he will actively participate in the pre-hike program.

A special featured event in connection with the hike this year will be the midsummer ski meet that will be held again on the glacier on Mt. Timpanogos. This is one of the latest ski meets to be held in the United States each year, and the heavy snows of the past winter have proved more than ever enticing for this year's meet.

The event is sponsored each year by the cooperative efforts of the Timpanogos Mountain Club, the Provo Chamber of Commerce and The Desert News. Some of the top skiers in the Intermountain West are expected to

be on hand for this year's races.

The Timp hike was postponed for its original date early in July because of the deep snow which would have made the climb almost impossible, Professor Hart said.

## Winter Quarter Classes May Be Held In New Science Building

Indications are that winter quarter classes may be held in the new Science building as complete termination of the project is expected on January 1, 1950.

July 24 will probably see the completion of all rough structure details when floor slabs and columns will be finished, and all brick work on the outside walls is expected to be completed by the first of September.

According to Dean Carl Eyring, all fixed equipment has been ordered and November 1 is the expected delivery date.

## Famous Texan Will Teach Calling, Square Dancing One Day Here

Brigham Young University Department of Physical Education has completed arrangements to bring Herb Greggerson, famous Texan Square Dance caller and instructor, to the campus July 13, for a full day of instruction in western square dancing and calling.

Mr. Greggerson conducts Square Dance Institutes each year at the State College of Washington and the University of Texas. He devotes his entire time to Square Dancing and is qualified as an instructor of both beginners and advanced dancers, organizing and instructing clubs throughout the United States, arranging festivals, and calling for square dances.

He also devotes a great deal of his time to teenagers. His teen age group of 13 Paso is the largest in the state of Texas, with callers trained by himself doing most of the calling.

He conducts callers institutes for the development of western style callers, and is author of Herb's Blue Bonnet Calls, one of the leading square dance books of the nation.

Mr. Greggerson will stop over on his way to Southern California to complete his tour of square dance institutes throughout the nation. In addition to his work traveling and teaching square dances, Mr. Greggerson has his own Ranch Dance School in Rudoso, New Mexico.

The Square Dance Institute to be held here Wednesday, July 13, will consist of three sessions, the first from 10 a. m. until 12 noon; another from 2 to 4 p. m., and ending with an evening session from 7 to 9 p. m.

A special fee will be charged to partially cover the expense of bringing Mr. Greggerson to Provo. Persons registered for the Summer Session may obtain a registration card from the treasurer's office, or at either the men's or women's gymnasium offices for the payment of \$1 fee. Persons not registered for summer session may obtain registration cards by writing or calling at these same offices upon payment of \$2 fee. Registration will be limited.

The Smith ballroom has been scheduled for the event.

The course has been especially planned for MIA workers, recreation leaders, teachers in elementary and secondary schools, and all who enjoy square dancing.

For information call or write Mary B. Benson or C. J. Hart, Brigham Young University.

HERB GREGGERSON

## Lambda Delta Sigma To Revive Activities

Activities of Lambda Delta Sigma, social-religious fraternity, are to be revived on the campus for the summer sessions, according to Bill Romney and Margene Nielson, next year's executive vice presidents of the men's and women's chapters, respectively.

Registration for the activities will be at the Lambda Delta Sigma office in the Smith building lobby next Monday and Tuesday from 9 a. m. to 12. Mrs. Ruth Peterson Romney will be in the office to register the applicants. Both members and non-members of Lambda Delta Sigma are invited to participate.

The activities will include a number of informal parties and get-togethers designed to acquaint students with each other, and to promote a spirit of fellowship. Mr. Romney said.

## J. Roman Andrus Takes Leave To Work on Doctorate

J. Roman Andrus, assistant professor of art at Brigham Young University, left Saturday for New York City where he will spend a year's leave of absence in advanced study.

Professor Andrus will study toward a doctor's degree at Columbia League in New York. He will be accompanied by his wife and four children.

## Ten BYU Students Attend Meeting

Ten home economics students from Brigham Young University attended the National Home Economics Convention in San Francisco, Calif., June 2 through July 3.

The BYU future homemakers constituted the largest group of delegates attending the convention from the Utah colleges. Two home economics groups were represented among the BYU group—Gamma Phi Omicron, honorary home economics society, and the BYU Home Economics Club.

Betty Argyle, Layton, vice president of the national home economics organization, was among the BYU delegates. Sherome Rogerson, president of the BYU Club and Lois Anne Nelson, immediate past president, were also in the group. Both are from Spanish Fork.

Other delegates were Veda Yarn, Leona Sevier; Nadine Mitchell and Arlene Knudsen, Provo; Sharon Adams, Layton; Gayle Looch, Ashtown, Ida, Pat Whitney, Dickinson, North Dakota; and Marie Kirihman, Salt Lake City.

## Campus Buildings Receive Cleanup

"We expect to have our buildings and grounds in better condition this fall than they have been for some time," Leland M. Perry, superintendent of buildings and grounds, said Tuesday.

Much of the exterior of the buildings in Wymount village has been painted, with painting and renovating of the interiors still in progress.

Painting of the interior of the library building and the branch building is complete, and the interior of the Smith building is now being painted. Many of the interior color schemes for these

buildings have been planned by experts in the field, Mr. Perry said.

All the stadium seats are due for a coat of varnish by fall, and the stadium house is slated for a few minor repairs.

Mr. Perry outlined a new policy that the school is putting into effect—that of continuous renovating and painting throughout the year, rather than waiting to do most of it in the summer. This year most of the back-log of work that accumulated during the war will be caught up, he said.
